The British Museum in London is the oldest public museum in the world. It opened in 1759 and now has more than 13 million objects. About six million visitors go there every year. The writing on the stone is in three different languages. This allowed people to understand ancient Egyptian hieroglyphics for the first time.

In my opinion, the most important part of the museum is the Great Court. Its big glass room makes it the most beautiful covered square in Europe. It opened in 2000, so it is also the most modern part of the museum.

I didn't hear from you a month ago. I hope you are well. I had a terrible day at school yesterday. My friends and I were playing volleyball in the playground when I suddenly fell. At first I didn't feel much pain, but later on my leg started hurting badly. I couldn't walk, so my friends helped me around. They took me to a hospital and stayed with me until my mom and dad arrived. The doctor said it was broken and I needed to rest for a month. We came home last night and I feel better now. This accident also made me know how valuable my friends are. I don't know what I would do without them. So I want to say I feel very happy to have such good friends like you.

About 70% of the world is covered by water, and 97% of this water lies in the oceans and seas. There are four oceans, the Pacific, Atlantic, Indian and Arctic. Fish are found both in fresh river water and in salty sea water. Small plants grow in shallow waters. Small organisms feed on these plants and in turn become food for small fish. The smaller fish are eaten by the larger ones. Warm waters are covered with coral reefs. There are areas in the seas which are very deep, so sunlight does not reach these areas. Ocean animals come in almost every shape and size. Sharks are actually fish! They do not have bones. They have sharp teeth. They have an excellent sense of smell, which helps them find food.
